**IMPORTANT!**  
CopyCentral has a new concept of a submission being with either Clearcast or your agency. If the script is with Clearcast then you won't be able to add new scripts. If you want Clearcast to work on the submission you MUST return it to Clearcast.

This submission is "With Clearcast" and you can't add an updated script. If you need to do so, contact your Clearcast executive who will return it to you.

You 'return to Clearcast' if the submission was pending your side. Button will be greyed out if the submission is already with Clearcast.

Here you can update the script or upload a substantiation or reference file.

You can post a comment at any time. Make sure you return the submission to Clearcast

**Note:** Parent/Child Association can only be made by Clearcast on CopyCentral and is only made when two or more TVCs are exactly the same apart from a minor change E.G URL or telephone number. Please notify us in the comments if your submissions can be parented as this can speed up the clearance process.

**Note:** Teams can be used as an effective way to manage the submissions you make. It is especially handy if you create a lot of submissions for different clients. You can name a team after a particular client and assign users to the team who are submitting for that client, they can then select the team on the new submission page and this submission will only be accessible to users assigned under the team.

**Super Users have access to all submissions regardless of which teams they are assigned to. But currently in order to submit under that team they will need to be assigned to it.**

# Sharing submissions with a trafficking agency or post house.
